

VINE CUTTING INSTRUCTIONS

Our objective is a strong tree canopy to foster regeneration of a healthy native forest

Cut vines in two places (don't pull!)

- 1: Low to the ground
- 2: As high as you can

The prime target is oriental bittersweet

- Spirals around itself and its trees
- Smooth bark

The secondary target is grape

- Drapes over limbs
- Hooks onto branches
- Flaky bark

**AVOID
POISON IVY!**

THANK YOU!!
